

Nuclear Waste Dump Coming HERE ?

Yet another federal agency wants to come to Otero County. They bring FREE MONEY (not really). The Department of Energy wants to drill a 17” diameter, 3 MILE deep hole called the Deep Borehole Test Project. It'll make everyone rich (ha).

Why? To see if nuclear waste could be dumped in deep holes.

They promise not to dump nuclear waste in this particular hole.

They DO NOT promise that similar holes in eastern Otero County won't be drilled and used for nuclear waste if the first hole looks good.

Why would they spend \$30 million and not use the area for a dump down the road?

The first hole is to be on private property. The owner has the right to drill. **HOWEVER, DOE wants local residents to approve** and support the first hole or they won't start here. **Just SAY NO TO THE BOREHOLE !** Your opinion counts.

Saying “NO” does not impact private property rights! Just DOE's interest.

Public Meetings, Come hear DOE and ask Questions!

NEW TIME - Alamogordo at Patron’s Hall, 1106 N. New York Ave., at 3 PM, March 14

Timberon at the Lodge at 6 PM March 15

Weed at the School at 6 PM March 16
